

Course Description

CAL – Advanced Architecture Course

AT A GLANCE

The Advanced Architecture Course (AAC) is designed as a multi-solution class that follows the VMware IT Value Model & Digital Workspace Journey Model (DWJM). These models are solution discovery methodologies that identify VMware Customers' desired IT transformation journey and how Professional Services can design an architectural solution roadmap that meets their journey requirements.

The sessions focus on enabling Senior Consultants and Architects on advanced consulting, communication, presentation and technical skills necessary to accomplish the VMware Customers desired business outcomes.

COURSE OUTLINE

- VMware IT Value Model and Digital Workspace Journey Model for Consultants
- Consultative Essentials
- Solution Design
- Business Transformation and Frameworks
- Modernizing Data Center and Integrating Public Clouds
- Transforming Security
- Empowering Digital Workspace
- Emerging Solutions & 3rd Party Integration
- Case Study & Uses Cases: Presentation & Evaluation

Description

The purpose of this intensive training is to strengthen architectural and solution skills by establishing a baseline and model to interact with VMware Customers, leading the discovery and effectively design and communicate VMware solutions.

Audience

VMware & Partners Sr. Consultants and Architects.

Duration

2 weeks (9 days).

Pre-requisites

- From intermediate knowledge to hands on:
 - VMware vRealize Suite Cloud Management Platform
 - VMware Cloud Foundation
 - VMware NSX
 - VMware Workspace ONE and Horizon
 - VMware vSAN
- Foundational knowledge of VMware IT Value Model and Digital Workspace Journey Model
- ITIL/TOGAF Foundation

Learning Objectives

By the end of this course, learners should be able to:

- Apply the IT Value Model & Digital Workspace Journey Model on customers engagements and utilize a standard approach to align with customer business needs
- Understand the industry standards methodologies and VMware engagement and delivery best practices
- Demonstrate advanced technical and executive presentation skills
- Successfully interact with VMware Customers, lead the discovery, develop and effectively communicate VMware solutions mapped to customer problems and desired outcomes
- Apply the conceptual architectural design in customer environments
- Design solutions in real time for customer engagements
- Confidently present VMware solutions to any audience
